

# Service & Material Specification Sheet

## MATERIALS AND SERVICE SCOPE - CONTROLLED PROCUREMENT EDITION

SIJO INFOTECH | Established 2017 | Hyderabad, Telangana | GSTIN 36AMOPV7979B1Z8

### Service scope

3D LED signage; ACP facade and elevation signage; industrial UV printing; wayfinding pylons and signage; corporate interior branding; digital LED display-related execution.

### Acrylic

Current website content references Mitsubishi cast acrylic for 3D LED channel letters and push-through signs.

Exact grade, thickness, colour code and outdoor warranty are project-dependent and must be taken from the approved supplier datasheet.

### Stainless steel

Current website content references Jindal stainless steel in 304 / 316 forms and hairline or mirror finishes.

Final grade, finish, thickness and source batch must be confirmed on the project material submittal.

### LED systems

The website references specialized 3D LED assembly and Samsung LED.

No approved lumen, wattage, colour-temperature or module model data is present in the current source set. These values must be confirmed from the manufacturer datasheet.

### Material approval

For tender, purchase order or engineering approval, selected materials must be supported by current manufacturer or supplier technical documentation, sample approval where required, and the final project drawing/specification.
